Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 22, drawn to method and kit for detecting HCV antigen and/or antibody and classified in class 435, subclass 5.
- II. Claims 18-21, insofar as drawn to protein consisting of SEQ ID NO:6, nucleotide sequence encoding it, corresponding vector and host cell, classified in class 530, subclass 350, e.g.
- III. Claims 18-21, insofar as drawn to protein consisting of SEQ ID NO:8, nucleotide sequence encoding it, corresponding vector and host cell, classified in class 530, subclass 350, e.g.
- IV. Claims 18-21, insofar as drawn to protein consisting of SEQ ID NO:12, nucleotide sequence encoding it, corresponding vector and host cell, classified in class 530, subclass 350, e.g.
- V. Claims 18-21, insofar as drawn to protein consisting of SEQ ID NO:16, nucleotide sequence encoding it, corresponding vector and host cell, classified in class 530, subclass 350, e.g.

Inventions II, III, IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are recombinantly produced proteins that have different amino acid sequences and are encoded by different nucleotide sequences, and hence have different biological and immunological characteristics.

Inventions II, III, IV, and V and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case (1) the process as claimed does not require the use of any of Inventions II, III, IV or V, and (2) the products as claimed can be used in a different process such as in affinity purification of antibodies or as an immunogen to raise antibodies.

Because these inventions are distinct for the reasons given above and the search required for any one invention is not coextensive with the search required for any of the other inventions, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
